PROFESSIONAL SUMMARY

Senior Node.js Developer and Backend Systems Architect with 10 years of experience building high-concurrency, low-latency platforms (20,000+ concurrent connections, 99.9% uptime) across iGaming, e-commerce, and healthtech. Specialist in event-driven microservices, real-time WebSocket systems, and message queues (Kafka, RabbitMQ, Redis), with a track record leading 5+ person engineering teams and owning production observability. Actively advancing into agentic AI engineering (LangChain, LangGraph, RAG, Claude/Anthropic API) for automated workflow tooling, with working knowledge of modern frontend and browser-automation tooling (Next.js, DOM/Browser APIs, Playwright).

TECHNICAL SKILLS

Languages/Runtimes: Node.js, Express.js, JavaScript (ES6+), Promises/async-await, TypeScript, React.js, Next.js, PHP

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, Real-Time Systems, WebSockets, Socket.IO, RESTful APIs, GraphQL, High Concurrency, State Synchronization

Browser & Web Platform: DOM APIs, Browser APIs & Web Standards, CORS/Cross-Origin Resource Sharing, Chrome Extension Development (Manifest V3), Browser DevTools & JavaScript Debugging

Testing & Automation: Jest, Test-Driven Development (TDD), Playwright

Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis

Messaging & Queues: Apache Kafka, RabbitMQ

Cloud, DevOps & Observability: AWS (EC2, S3, ECS, ECR, Lambda, SQS), Docker, PM2, Linux/Ubuntu, GitHub Actions (CI/CD), Prometheus, Grafana

Methodologies & Collaboration: Agile/Scrum, Extreme Programming (XP), User Stories & Technical Documentation, Git, GitHub, Jira

AI Engineering: LangChain, LangGraph, AI Agents, RAG, OpenRouter API, Claude/Anthropic API

Industry Expertise: iGaming, Fintech, E-commerce, Healthcare

Payments: Stripe, PayPal, Swedbank Pay, Verifone, Vipps, Nets, CoinPayments

PROFESSIONAL EXPERIENCE

Senior Node.js Developer / Backend Architect | AIS Technolabs, Ahmedabad

Oct 2018 – Present

- Architected distributed backend infrastructure supporting 20,000+ concurrent users with 99.9% platform uptime across high-traffic environments.
- Redesigned Redis caching and Pub/Sub workflows, reducing database load by 35% while improving synchronization latency and API throughput.
- Implemented production observability with Prometheus and Grafana, building metrics dashboards and alerting pipelines.
- Led and mentored an engineering team of 5+ developers through code reviews, system design, and architecture planning, writing user stories and technical documentation to guide sprint delivery.
- Served as primary technical point of contact for international clients in Norway and France.

Key Client Projects — AIS Technolabs

Spillorama Bingo Infrastructure (Norway) — Remote

2024 – Present

- Designed hybrid Bingo infrastructure synchronizing 40+ physical halls with low-latency online participation, achieving sub-100ms sync between TV displays and mobile players.
- Delivered five game engines (Papir Bingo, Lyn Bingo, Bingo Bonanza, Turbo Mania, SpinnGo) and integrated third-party providers Metronia and Ok Bingo into settlement flows.

iGaming Platforms — Poker, Belote, Crash Games, Lottery & Slots

2018 – 2023

- Built scalable real-time backends for multiplayer Poker & Belote, provably fair Crash Games, RNG-based slot games, and a Pick 3/4/5 lottery platform (Jackpot Aruba), using WebSockets/Socket.IO and Kafka.

- Delivered tournament workflows, crypto & fiat wallet support, and automated draw/prize-calculation engines supporting real-time participation at scale.

Enterprise E-Commerce Microservices Suite

2025

- Engineered event-driven e-commerce microservices (Node.js, Express, PostgreSQL) for high-volume order processing and inventory, cutting checkout latency by 42% via Kafka/RabbitMQ messaging.
- Built real-time order tracking via WebSockets and webhook integrations with logistics and payment gateways.

WeWatchOver — Health & Safety Monitoring System

2025

- Maintained the production backend for a wearable-based patient monitoring system, processing real-time biometric streams (heart rate, SpO2, GPS) from Fitbit, Oura Ring, and E88 smartwatches.
- Built rule-based threshold alerting (Twilio SMS) and Socket.IO-powered live dashboards for real-time patient vitals visibility.

Dating & On-Demand Food Delivery Apps

2023

- Built proximity-based matchmaking (Redis Geospatial, MongoDB) for a dating platform and a driver-dispatch engine with dynamic geofencing for a food delivery app, both with live GPS streaming via WebSockets.

AI-Based PR & Commit Review System (Independent Initiative)

2026 - Present

- Built AI-powered code review automation using LangGraph, LangChain, and the OpenRouter API to streamline the team's merge process.
- Reduced manual review effort by automatically detecting logic flaws, memory leaks, and security issues before code merges.

Multi-Agent Customer Support Platform (Independent Initiative)

2026

- Built a multi-agent AI support platform (Vercel AI SDK, Ollama with Gemini cloud fallback) that classifies customer queries and routes them to Order, Billing, and Support agents for real-time database lookups.
- Implemented Zod-validated structured tool outputs and SSE streaming on Node.js/Express, with Prisma and PostgreSQL + pgvector for data and semantic search.
- Set up a GitHub Actions CI/CD pipeline to build and push container images to Amazon ECR, deploying automatically to AWS ECS.

PHP Developer | Artoon Solutions, Surat

Aug 2016 - Aug 2018

- Supported high-traffic PHP and WordPress web applications and REST APIs across multiple client engagements, including a custom employee tracking dashboard for attendance and productivity monitoring.
- Developed WordPress e-commerce sites with fully custom themes, plus custom plugins (including an animated time-based counter widget) for client marketing and engagement needs.
- Completed custom WordPress theme and plugin development for Bariatric Surgery Source (healthcare) and MN2S, an international talent-booking platform, including on-page SEO to improve organic search visibility.

EDUCATION

- Bachelor of Engineering, Electronics & Communication — Gujarat Technological University (GTU), 2015 | CGPA: 8.06

TRAINING & CERTIFICATIONS

- PHP Development Certification — Tops Technology, 2016
- Generative AI Engineering & Agentic Workflow Workshop — Outskill, 2026
